You will be happy to know ...

Convalescent plasma from Covid cured persons has been successfully used in the State. We have by now more than 15000 cured persons in Odisha who can save the valuable lives of 30,000 seriously Covid affected patients. They can further glorify their victory over corona by saving lives through plasma donation.

The first plasma bank of the state is inaugurated and functionalized by Hon’ble Chief Minister at SCB Medical College Hospital, Cuttack.

Plasma can be sent to other Covid Hospitals for use of the patient.

This is a new hope for the state.

Plasma donation is like blood donation

Volunteer to donate plasma and save lives from COVID-19

Government of Odisha

Together we will defeat Corona
The entire World is endeavouring for a drug or a vaccine for corona. But success is still awaited. However, Plasma Therapy is a new hope. Convalescent plasma from Covid patients has proved successful in curing severely affected Covid-19 patients. A lady patient, given the first plasma therapy in Odisha, has been cured successfully which added another glorious chapter to corona battle in Odisha. Hopefully, this strategy will not only become the major method of saving lives from corona but also remove our fear against it.

This is not a story, but a fact, narrated by a corona winner the first & fortunate lady who could knock down Covid-19 after plasma therapy. The lady expressed her feelings today with a touch of emotion, gratitude and inner happiness spontaneously spilling out from the deepest core of her heart. This is no doubt, another mile stone in the journey towards victory over Covid-19 in Odisha.
